

What Is It? AV2 is a convenient “ready to use” cleaning solution specifically designed for inflatable structures.

Who Needs It? If you provide inflatable structures, either at a swimming pool, sports facility or outside area, for use or hire by your customers or members.

What Does It Do? AV2’s unique formulation both cleans and disinfects the exterior of the structure, which is a proven breeding ground for bacteria and other micro organisms.

How Does It Work? AV2 is a blend of natural oil based cleaners with a functional biocide for disinfection. The natural oils ensure that the cleaning phase will also remove dirt, body fats and other undesirable elements which accumulate over time due to both use and storage. The broad spectrum biocide is effective in both combating any build up of algae, during the cleaning phase, whilst also providing ongoing disinfection whilst the structure is in stored between uses.

How Do I Use It? AV2 is easily dispensed through our hand held pump action spray bottle. You must always that the pump action bottle has been pressurised prior to pressing to trigger to apply the product. Always be careful when handling chemicals and follow the instructions on the product safety data sheet.

How Much Do I Need To Use? AV2 comes in a ready to use liquid so there is no need to dilute concentrated products which can affect the efficacy of the final product.

How often do I need to use the product? For best results use AV2 monthly.

What Sizes Does It Come In? AV2 comes in 5 litre containers of ready to use product and these are packed 2 in a case.
